Others: Scrum, Jira and Confluence, Agile, Jenkins, CI/CD pipeline, Bitbucket, GitHub, GitHub Actions, Docker, Protractor, Selenium

Experience

Medline Industries, Chicago IL IS developer Analyst

Feb 2022 –Present

- Independently managed the development of two projects from scratch, using Angular 13, JavaScript, Ag-Grid as a JavaScript framework, HTML, and CSS to craft user-friendly web applications.
- Implemented and managed the web application deployment on MS Azure, utilizing CI/CD practices and tools for seamless integration and delivery.
- Utilized the company's CSS library to ensure consistent typography and styling across Medline projects.
- Stayed Updated with the latest trends and technologies in UI development to enhance the project's performance and user experience.
- Showed expertise in Async/Await and ensured the creation of clean, testable, and well-documented code to enhance application robustness and maintainability.

Bank of America, New Jersey Senior UI Developer

June 2020 – Dec 2021

- As a Senior UI Developer, I took the lead in enhancing the internal web application primarily used by internal agents.
- My responsibilities involved leveraging AngularJS, CSS3, Bootstrap-4, Kendo Grid, JavaScript to optimize its functionality and user experience.
- Collaborated with User Experience Designer and product owner to conduct performance tests aimed at boosting conversion rates and enhancing user engagement.
- Crafted JUNIT cases and automated UI tests using Cucumber, Protractor, and Selenium; employed Http-server for End-to-End testing.
- Executed tests on SIT and UAT servers with real-time data; used Jasmine and Karma for unit testing to enhance code maintainability, reliability, and robustness.

Dun & Bradstreet, Center Valley PA Web Developer (<https://www.iresearch.dnb.com/>)

Jan 2019 – June 2020

- Proposed architectural plan and led the migration from AngularJS 1.9 to Angular 11 through a hybrid approach and establishing it as the primary front-end framework.
- This transformation enabled the creation of views, connection of models to the DOM, and seamless data synchronization with the server, resulting in a robust Single Page Application.
- Customized the front-end as required using HTML, CSS, and a technology stack that includes TypeScript/ES6, Angular 11, and Angular CLI. This involved the creation of components, services, pipes, and directives.
- Used Angular 11 Template Driven forms and Modern Driven (Reactive) forms to perform form validations. Worked on some of the new features like new if else syntax, ng-templates, and form validators.

Anthem Inc, Norfolk, Norfolk Virginia UI/Front-End Developer

Aug 2018 – Dec 2018

- Responsible for developing mobile application called Anthem Anywhere by writing well-structured, easily maintainable, and well-documented code using AngularJS and JavaScript and jQuery. Created Custom Directives, filters, made use of Modules, and \$http service from controller.
- Utilized AngularJS to bind HTML template to JavaScript object & performed Parent & Activity provider UI designs, from concept through final product release for web and mobile application in responsive design.
- Meeting with UI development teams, project managers, and customers to ensure alignment with project specifications.

SQA Labs, Glendale, AZ UI Developer/UX Designer

April 2018 – Aug 2018

- Executed a front-end development project to build a website, including development user interface using Angular 2, TypeScript, HTML, and CSS.
- Responsible for creating JavaScript code for different modules. Design prototype using Axure, Photoshop, and Illustrator concept designs.

Perseverance Software's Pvt. Ltd, India UI/UX Web Developer (<http://perseverance.in/>)

Jan 2014 – Jan 2016

- Responsible for designing, maintaining, and updating websites using JavaScript, J-query, PHP and HTML, bootstrap. Designed user-centered Web sites with sophisticated production values and intuitive navigation to maximize user engagement.
